

# Printerman Setup Guide

## You will need:

- 1x Pc/Laptop
- 1x Printer

## Tutorial

- Firstly, install the printer drivers. When this process is completed, make sure you have connected the printer to the PC/Laptop via cable or network. You can run a test print to make sure printer is connected successfully.
- As next step, you need to download our application by clicking on this link: <https://www.fimble.gr/admin/pub/printerman/v3.2/printerman.exe>. If you have an Apple device, after downloading the file you will need to select the file type from .exe to .jar.
- Now you can open the application. The first thing you will do is find this icon  in application's interface. By clicking it will take you to this page:

The screenshot shows a dialog box titled "STORE INFO" with a folder icon. It contains three input fields: "URL", "USERNAME", and "PASSWORD". A login button with a right-pointing arrow icon is located to the right of the "PASSWORD" field. A "CANCEL" button is at the bottom center.

- After entering your account credentials, press the login button and you will be taken to this page:

**Printerman Settings**

**STORE INFO**

URL  
https://demo.fimble.io

USERNAME  
fimble

PASSWORD  
\*\*\*\*\* 

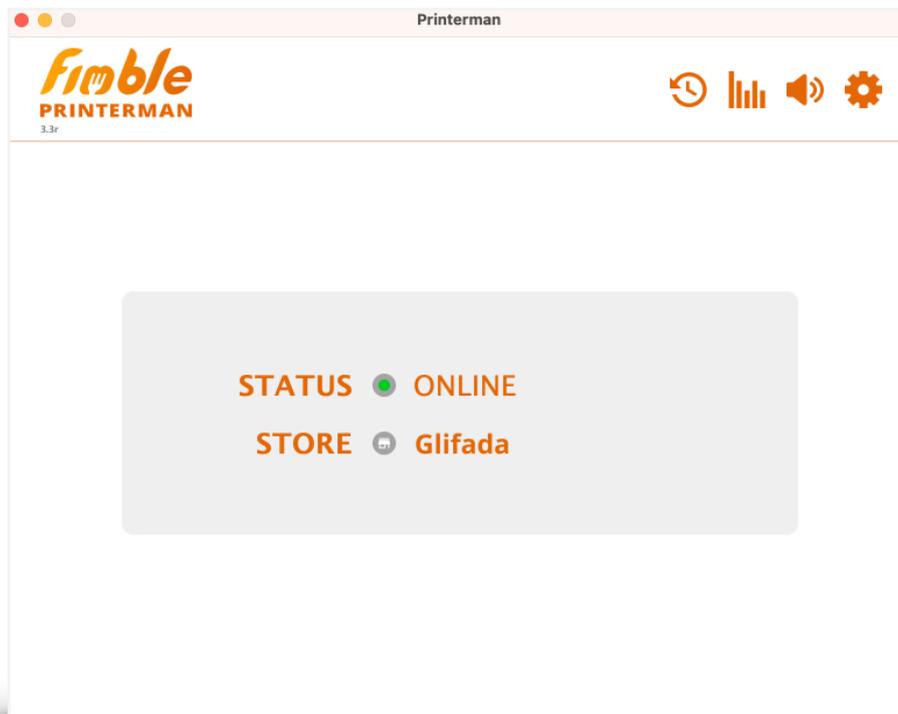

STORE  
Glifada (99)

**PRINTERS**

Test Printer Invoice  
No printer

Test Printer Drive-thru  
No printer

- Here, you should select the store. Make sure you select the correct printers in this step. Opening the "Printer Order" and "Sales (Local)" dropdown will display a list of nearby printers. You should select the printer which you installed the drivers in the previous steps. When you have entered these details, save them by pressing the "Save" button.
- Clicking the save button will take you to printerman's homepage where you can see the status and the store you have selected. Status = online means everything is working properly. If this status changes to "offline", simply restart the printer application.
- If you want to check that the printerman application is connected to your printer, you can create a print report. To generate a print report, you must press this icon  on the home page and then the button  where you can find it at the bottom of the page. If your printer prints paper, it means it is working properly.

- You have completed the printer setup process. You can place new orders through the POS application or through your website. Orders will appear in echo's Orders Monitor application and must have a status of "P" to print on Printerman.
